TECHNICAL SKILLS

Programming Languages: Python, Java

Generative AI & LLMs: Prompt Engineering, LLM Application Development, RAG, Multi-Agent Systems, LLM Fine-Tuning

AI/ML Frameworks & Tools: LangChain, LangGraph, Hugging Face, TensorFlow/Keras, Scikit-learn, YOLO

Cloud & DevOps: Microsoft Azure, FastAPI, Docker, MCP, Git, GitHub, CI/CD

PROFESSIONAL EXPERIENCE

AI Engineer — Docu3C (August 2025 – July 2026)
Seattle, Washington, USA (Remote) · AI Engineer Intern

- Architected and deployed multi-agent AI systems using LangChain, LangGraph, LangSmith, LiteLLM, and Temporal, implementing agent orchestration, tool calling, autonomous workflows, and LLM prompt engineering across GPT-5, Claude, and DeepSeek.
- Built and shipped cloud-native AI applications on Microsoft Azure, integrating Salesforce, ServiceNow, MCP servers, REST APIs, and automated document-processing pipelines as the sole developer, owning architecture, implementation, testing, deployment, and production support.
- Engineered and validated hybrid AI reasoning systems combining deterministic rule engines with LLM agents; developed benchmarking and calibration frameworks using expert-labeled ground truth, while leading applied research in Generative AI, NLP, semantic search, and vector search to improve production reliability and performance.

Backend & Flutter Developer — amasQIS.ai (Apr 2025 – Oct 2025)
Omen (Remote)

- Contributed to the Front-End team on a Personal Protective Equipment (PPE) Compliance project, building responsive UI components and webpage layouts. Served as Backend Developer on a Predictive Maintenance project, integrating a YOLO computer-vision model for automated defect detection.
- Acted as Lead Flutter Developer for two AI-assisted products — an LLM Workspace Adviser and a VLM Workspace Adviser — managing end-to-end mobile application development.

FEATURED AI & SOFTWARE PROJECTS

LexAI — AI-Powered Legal Technology Platform

- Built a full-stack AI legal assistant using Flutter, React, and FastAPI, implementing hybrid retrieval-augmented generation (RAG), REST APIs, WebSockets, and voice-enabled legal Q&A across web and mobile. Deployed the web app on Firebase Hosting and containerized the backend for Google Cloud Run within a monorepo architecture spanning mobile, web, service, and research layers.
- https://lexai-3fd1a.web.app

paperstack — MCP Backend for arXiv Research (3624 PyPI downloads)

- Built and published a production-grade MCP server (paperstack-mcp) on PyPI for AI research assistants, implementing arXiv search, semantic indexing, citation analysis, and LLM context generation. Delivered asynchronous processing, caching, and REST-based integrations, driving 477+ package downloads via CLI, API, and MCP integration for VS Code and agent frameworks.
- https://pypi.org/project/paperstack-mcp

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) — VIT Bhopal University 2023 – Present CGPA: 8.87 / 10

LANGUAGES

English, Tamil, Hindi, Japanese
