

ALDRIN JOAN PANDIAN W

CONTACT

- 8220863200
- aldrin.23bai11298@vitbhopal.ac.in
aldrinjoan6@gmail.com
- Coimbatore, Tamil Nadu

EDUCATION

B.Tech CSE with AIML
VIT BHOPAL UNIVERSITY
8.6 CGPA (current)

CLASS X & CLASS XII
Carmel Garden Matric Hr Sec School,
Coimbatore,
100%
75%

SKILLS

- Java
- C++
- Python
- Android Development
- Flutter
- AI & Machine Learning
- Natural Language Processing (NLP)
- Web Development (Django)
- Problem-Solving
- Team Collaboration
- Research Skills

LANGUAGES

- English (Fluent)
- Hindi (Understandable)
- Tamil (Fluent)
- French(Proficient in reading)

PROFILE

Aspiring Computer Science Engineer specializing in AI & Machine Learning, with a strong foundation in web and mobile development. Experienced in leading teams, problem-solving, and cross-disciplinary research, particularly in healthcare AI applications. Passionate about leveraging technology for impactful solutions, with expertise in front-end frameworks, neural networks, and predictive modeling. Proven track record in research, mentorship, and competitive programming, complemented by leadership roles in hackathons and academic initiatives.

PROJECTS

Hand Sign Language Translation Using CNN

Developed a deep learning model using Convolutional Neural Networks (CNN) to translate hand signs into text and vice versa. Implemented computer vision techniques to enhance gesture recognition accuracy and improve accessibility for the hearing-impaired.

AI-Powered Mentor-Mentee Platform

Built a web-based mentorship platform using AI-driven matching algorithms to connect mentors and mentees based on skills and goals. Integrated real-time chat, video calls, and scheduling features to enhance user engagement and streamline the mentorship process.

Heart Disease Prediction Using Machine Learning

Designed a predictive model leveraging machine learning algorithms to assess heart disease risk from patient health data. Utilized classification techniques, feature engineering, and data visualization for improved diagnostic accuracy and interpretability

RehabEase - AI-Powered Rehabilitation Platform

Developed a Flutter-based mobile app and a web platform to support patient recovery through personalized rehabilitation exercises. Integrated AI-driven motion tracking, real-time feedback, and progress visualization to enhance mobility, independence, and health outcomes.

CERTIFICATIONS

- EC Council Certified Ethical Hacking V12 - EC Council (2023-27)
- CSIR Sponsored National Seminar on Vehicular Cloud Model - CSIR (2024)
- 3rd International Conference ICRP-2024 - ICRP (2024)
- AI Engineering - IBM

EXPERIENCE

- Team Leader - Smart India Hackathon 2024 (Darth Coders)
- Research Assistant - VIT Bhopal University (09/2023 - Present)
- UGC NEP SAARTHI - Student Ambassador (01/2025 - Present)
- International Internship in amasQIS.ai from Placement Office (Present)
- Intern - ApexPlanet Software Pvt. Ltd. (20/10/2024 - 04/12/2024)
- Completed 7 Grades in Keyboard - London College of Music (LCM) & Trinity College of Music

RESEARCH

- AI-Driven Predictive Maintenance for Smart Grid Components Architecture Applications, Challenges and Opportunities, Springer
- Review on Deep Learning Methodologies and Applications in Leukaemia Diagnosis, Book Chapter
- The Role of Artificial Intelligence in 6G Networks, Architecture, Protocol, Transmission and Applications
- Prediction of Heart Disease Presence Using Multiple Machine Learning Algorithms
